VALANCE

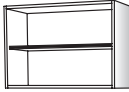

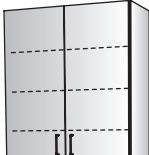

Advantage Scientific valance and slope valance units are designed to allow continuous valance aprons under wall units. A finished end/drop left or drop right indication lowers the designated end panel to align with the valance rail. Field cutting of intermediate sides is not required to install under-cabinet valance lighting. Return corners are not required upon installation.

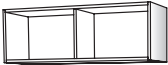

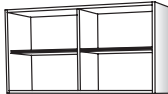

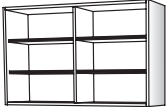

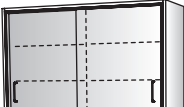

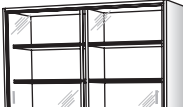

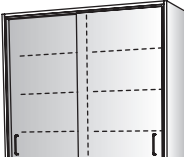

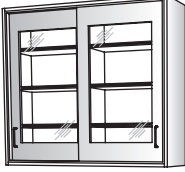

LEFT FRONT CORNER

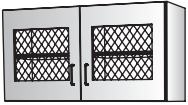

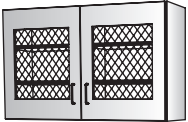

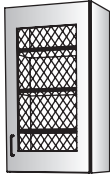

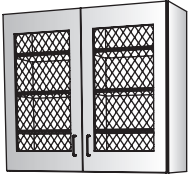

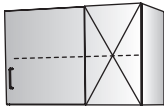

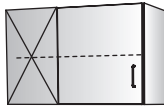

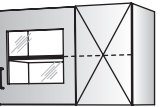

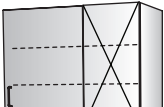

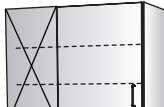

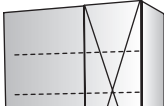

Because cabinet bottom is set up in relation to door bottom edge, exposed hinges will not align with conventional cabinet hinge locations. Pulls and locks will not align with conventional pull and lock locations.
